

ABSTRACT OF THE DISCLOSURE

There is provided a polarizing film of a polyvinyl alcohol film in/on which dichroic dye is adsorbed and oriented, wherein a hue angle H is in a range of 105° to 150° , and a chroma C^* is 7 or smaller, providing that a parallel hue is expressed on a chromaticity coordinate of (a^*, b^*) . There is also provided a polarizer comprising a film having the optical compensating function and a polyvinyl alcohol film in/on which dichroic dye is absorbed and oriented, wherein a hue angle H is in a range of 105° to 150° , and a chroma C^* is 9 or smaller providing that a parallel hue thereof is expressed on a chromaticity coordinate of (a^*, b^*) .
